Workshops UK

Ideally situated close to 4 major UK Airports, our 10,000 sq. ft. purpose built facility holds today's state-of-the-art test equipment and Computerised management systems. Our commitment to provide an award winning service gives us a formula that we believe differentiates us from our competitors.

Electrical Workshop

This workshop is fully equipped with a 60KW variable speed generator drive unit, capable of speeds up to 15,000RPM and load banks with a capacity up to 60 KVA and 500A DC. Heavy AC and DC supplies are available for the testing of a large range of electrical and electronic aircraft components. The versatility of the electrical workshop ensures a wide range of components are covered, giving our customers large electrical component coverage on a variety of aircraft types.

- ▶ AC and DC generators/motors
- ▶ Voltage regulators
- ▶ Generator control panels
- ▶ Igniter units
- ▶ Relays and Contactors
- ▶ Cooling Fans
- ▶ Landing Lights and Navigation Lights
- ▶ Inverters & Actuators
- ▶ Interior Lights
- ▶ Fuel Tank Probes
- ▶ Window Framing & Transparencies

Cleanroom

- ▶ Aircraft clocks
- ▶ Vertical Gyros
- ▶ Horizon Gyros
- ▶ Directional Gyros
- ▶ 3 axis Gyros
- ▶ Course Indicators

Our Cleanroom is equipped with its own air-filtration system, to maintain optimal atmospheric conditions. We are fully equipped to calibrate repair and overhaul the full range of gyroscopic and precision instruments. Due to our emphasis on quality, the specialist environment and the highly skilled resources we offer, Oakenhurst has contracts supporting a number of OEMs with this highly specialized equipment.

Avionics Workshop

This purpose-built Workshop is equipped with high precision test equipment and offers an extensive capability on all types of general cockpit instrumentation. Units covered range from engine monitoring to manometric type instruments such as Altimeters (Servo & Sensitive), Airspeed Indicators, and various general indicators. Some units are franchised and supported fully by the OEM.

- ▶ Altimeters
- ▶ RMIs Fuel flow/quantity indicators
- ▶ Tacho indicators
- ▶ Aircraft clocks
- ▶ Flight systems instruments
- ▶ Landing Lights
- ▶ Interior Lights
- ▶ Battery assemblies & Battery power supplies
- ▶ Strobe lights & Anti-collision lights
- ▶ Window lights, ceiling lights, utility floodlights, cockpit lights
- ▶ Temperature switches
- ▶ Pressure switches

Radio / Radar Workshop

Radio and Radar will always be a vital part of aircraft avionics. Extensive investment allows us to manage both old and new avionic technology. Our Radio Workshop has the facility to meet the needs of our customers and the flexibility to adapt to future requirements.

- ▶ Weather radar
- ▶ VHF communication
- ▶ Control units
- ▶ Passenger address
- ▶ HF communication
- ▶ VHF navigation equipment
- ▶ Headsets and microphones
- ▶ Marker receivers
- ▶ ATC transponders
- ▶ DME equipment
- ▶ ADF receivers
- ▶ Cockpit Voice Recorders
- ▶ Megaphones
- ▶ Cabin handsets

Galley Workshop

- ▶ Ovens
- ▶ Water boilers
- ▶ Coffee makers
- ▶ Hot jugs
- ▶ Refrigerators
- ▶ Trash Compactors

Galley equipment has become an area of increasing importance to all airlines. This purpose built and well equipped workshop provides support on a wide range of Galley equipment. We have a range of purpose built test stands that provide the capability to test any type of Water Boiler, Oven, or Coffee Maker. With our sharp focus on quality, reliability and value. The maintenance repair and overhaul service provided by Oakenhurst has become critical to its customers.

In Flight Entertainment Workshop

Our IFE Department has the capability to carry out full component repairs on the GMIS system produced by BAE, more recently we have become a Warranty Repair Station for Goodrich Interior cabin electronics systems. (Formerly known as Audio International).

- ▶ Touch Screens
- ▶ DPCU
- ▶ TDPCU
- ▶ Telephone Units
- ▶ Drop down monitors / PSU
- ▶ DVD Players
- ▶ Lighting Panels
- ▶ Control Panels

R&D Workshop

Oakenhurst has installed a fully functioning research and development facility to better support our customers. With this workshop we are able to design and manufacture specialist test equipment / tooling to the OEM's exact specifications.

- ▶ The design & Manufacture of specialist tooling
- ▶ Build test equipment to manufacturer's exact specifications.
- ▶ Facilitate training in new capability development.

Workshops - UK

Oxygen / Safety equipment Workshop

Due to an increasing customer demand Oakenhurst are developing a new workshop to cater for the maintenance repair and overhaul of safety equipment. The new workshop is being developed with the customer in mind and will continue to provide a level of service that differentiates us from the competition.

- ▶ Oxygen Bottles / Pressure Vessels
- ▶ Oxygen Masks
- ▶ Overhead Service panels

Workshops - Ukraine

Our purpose built Ukraine facility is situated close to Kiev at Boryspil Airport and is ideally placed to provide a quality service solution via our dedicated team of professionals. Day to day direct communication between Ukrainian, Russian and Western Aircraft operators allows us to better understand the needs of our customers and provide a service that is essential in supporting these commercial aircraft in a region that has been largely under resourced.

Emergency Equipment

This shop is equipped with a hydrostatic test stand approved by the US DoT Hazmat Department and offers capability to test and certify a variety of pressurized bottles. We also have all the necessary equipment to provide repair and overhaul on most types of evacuation slides and oxygen masks.

- ▶ Evacuation slides
- ▶ Oxygen cylinders and regulators
- ▶ Oxygen masks

Galley Workshop

- ▶ Ovens
- ▶ Water boilers
- ▶ Coffee makers
- ▶ Hot jugs

Our Galley Shop has a range of purposely designed and built test stands that provide capability to test any type of water boilers, ovens, and other galley equipment. We have extensive experience in the galley equipment repairs of any complexity and offer solutions for our customers understanding the role this equipment plays in quality in-flight passenger service

Radio / Electrical Workshop

Our Ukraine Radio / Electrical component workshop is fully equipped with a wide range of test equipment that offers a large capability for a variety of aircraft types. Our dedicated and highly trained staff, continue to expand the workshop in line with our customers' expectations.

- ▶ AC & DC Voltmeters
- ▶ Generator control units
- ▶ Bus protection panels
- ▶ Control panels
- ▶ Window lights, ceiling lights, utility floodlights, cockpit lights
- ▶ Strobe lights & Anti-collision lights
- ▶ Headsets
- ▶ Microphones & Megaphones
- ▶ Pressure switches
- ▶ Temperature switches
- ▶ Engine APU fire modules
- ▶ Overheat detectors
- ▶ Battery assemblies & Battery power supplies

Manufacturing

SKYCAM is a specialised colour aircraft CCTV (Closed Circuit Television) designed by Bournemouth Aviation [BA(C) Ltd]. This highly adaptive system can be retro fitted to almost any aircraft. The Skycam can be used to monitor all internal cabin, Freight hold or external areas and is ideal as a standalone security system. For a price point of under £10,000.00 Skycam is supplied complete inc, VDU, Cameras, installation kit certification and a full EASA approved installation & design package.

Sales and Component Repair

Component Repair

Turn around time and cost effectiveness is vital to our customers. In respect to this Oakenhurst aggressively pursues alternatives for the control of cost on parts and labour. We have access to a worldwide supply chain of component inventories enabling us to offer our customers fast, cost-effective and reliable solutions for all their spares procurement needs. Our dedicated AOG service enables us to offer around the clock customer support, keeping your aircraft downtime to an absolute minimum. Our experienced sales & purchasing teams can support you with all of your spares requirements covering a wide range of aircraft fleets at competitive prices.

Sales & Purchasing Support

Oakenhurst is an established worldwide equipment sales and service organisation. We maintain a large inventory covering a wide range of aircraft spares, including avionic equipment, instrumentation, components and accessories. Our experienced customer service team are committed to keeping you in the air whatever your requirement may be. As an established part 145 repair organisation we understand the importance of controlling costs without compromising on quality and we are proud to offer award winning repair management services ensuring guaranteed TAT, total flexibility and competitive pricing.

- ▶ Spares procurement & provisioning
- ▶ Part sales
- ▶ Exchanges
- ▶ Aircraft spares
- ▶ Loans
- ▶ Consignment contracts
- ▶ Third party Component Management repair & overhaul service
